Verified Findings

[HIGH] Mobile viewport not detected

Category: Mobile Experience

Evidence: No standard mobile viewport meta tag was detected.

Commercial Impact: The website may display poorly on phones, creating friction for mobile guests.

Recommended Action: Implement responsive viewport configuration and test the booking journey on mobile.

[HIGH] No room booking route detected

Category: Booking Journey

Evidence: No recognised hotel booking link was found during the scan.

Commercial Impact: Guests may be unable to move directly from browsing the website into a room booking.

Recommended Action: Add a prominent direct-booking CTA linked to a working booking engine.

[LOW] Google Analytics not detected

Category: Analytics

Evidence: RK Monitor did not detect common Google Analytics or Google Tag Manager markers.

Commercial Impact: The property may have limited visibility into website and booking behaviour.

Recommended Action: Confirm whether analytics are configured and tracking useful conversion events.

Recommended Next Step

Review and address the verified findings above, prioritising issues that may affect the guest journey or direct booking experience.
