Verified Findings

[MEDIUM] Mobile layout contains clipped navigation content

Category: Mobile Experience

Evidence: 3 critically clipped element(s) were detected at a 390px viewport. Navigation overflow was also detected.

Commercial Impact: Mobile guests may encounter cut-off or difficult-to-use navigation and page content.

Recommended Action: Review the mobile navigation and responsive layout at common phone widths and remove visible content clipping.

[LOW] Booking provider not recognised

Category: Booking Journey

Evidence: A booking link was detected, but RK Monitor could not identify the provider.

Commercial Impact: The booking journey exists, but further review is required to understand how guests are being routed.

Recommended Action: Manually review the booking destination and confirm that it is appropriate for direct reservations.

Recommended Next Step

Review and address the verified findings above, prioritising issues that may affect the guest journey or direct booking experience.
